

Why Replace when you can **RESTORE ?**

Remove moisture from material affected by Water Damage.

WATER DAMAGE RESTORATION

MOISTURE REMOVAL & DRYING SERVICES

Water Damage can STRIKE in any form...

- × Floods, Cyclones, Hurricanes
- × Fire Control / Fire Fighting Activities
- × Broken Water Pipes/ Defective Fixtures/ Leakages
- × Moisture Ingress due to Human error / Accidents / Vandalism/ Faulty Construction

THE AFFECTED

- Individuals
- Businesses
- Insurance Industry
- Disaster Management Agencies

How can it affect you?

- Damage to property, assets & collectibles
- Extremely high Reconstruction/ Replacement Costs
- Business interruption & profitability at stake
- Loss to Insurance Companies: Unbudgeted compensation expenses due to high insurance claims

Solution:

Technical Drying Services (TDS), pioneers in RENTAL Dehumidification, provides water damage restoration and drying services. Through removal of moisture by desiccant dehumidifiers, TDS provides drying services at your facilities and allows you to effectively restore your products & materials damaged by moisture ingress.

What YOU can RESTORE

- Furniture
- Electronic equipment
- Archival Materials
- Art, Antiques & Collectibles
- Carpets
- Electro-mechanical equipment (Turbines, Generators, Panels etc) and many more...

THE PROCESS

Restoration involves drying and eliminating moisture from affected materials. Desiccant dehumidifiers ensure moisture removal and high velocity air blowers speed up the evaporation process for quick drying.

The restoration process prevents secondary and tertiary damaging effects caused by standing water and further damage due to fungus, mold, mildew, corrosion etc.

Expertise in moisture removal and Technical team with over 15 years of dehumidification experience, TDS will help you get back in business as early as possible.

Process We Follow

- ✓ Site Assessment
